

WHO WE ARE

we may not be able to create happiness. But we can increase it; through what we do – and how we do it

Vegannett is an organic company passionate about crafting unique and delicious spreads based on nut butter or hemp combined with an abundance of organic vegetables. Going beyond traditional spreads, our products serve a variety of purposes, from pesto and pizza sauce to dressing bases, soup boosters, and more. Made by hand, Vegannett takes pride in personally handling all ingredients to ensure exceptional quality and taste.

With a focus on vegan, gluten-free, lactose-free, and "no added sugar" offerings, we strive to create nutritious and satisfying spreads that touch people's hearts and bring happiness to their dining tables. Established in 2016, Vegannett is dedicated to preserving cherished spreads from SONNE Naturkostspecialties, acquiring their recipes and infusing them with their own innovative creations.

Today, Vegannett is backed by a community of committed people who love, make and constantly develop our nut butter.

WHY VEGANNETT?

High-quality European ingredients

Each of our products is hand-crafted. We combine high-quality cashews and peanuts with regional vegetables and exotic spices. Fruity, juicy olives from Greece, sweet paprika from Spain and Mediterranean tomatoes merge with nuts and spices to create a unique spread.

The healthier choice

We want to give people something good from the heart: healthy, nutritious and somehow different. Our spreads are based on a high nut content and outstanding energy and nutrient density. Plus, they're EU Agriculture Organic and dairy, gluten, lactose and added-sugar free.

Delicious and versatile nut butters

Our recipes are simple, honest and down to earth. Our nut butters are super creamy, and make you feel full and satisfied. They're much more than just a spread though! Use as a pesto or pizza sauce, a dressing or soup base, a cheese substitute or dip...the possibilities are endless.
